**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-5, drawn to a data source, classified in class 370, subclass 389.
  - II. Claims 6-8, 16, and 17, drawn to a data conversion device and method, classified in class 370, subclass 465.
  - III. Claims 9, 10, 14, 15, 18, 19, 22, and 23, drawn to an auxiliary data file generation device and method, classified in class 370, subclass 392.
  - IV. Claims 11-13, 20, and 21, drawn to a data inverse conversion device and method, classified in class 710, subclass 65.
  - V. Claims 24-34, drawn to a reception method, classified in class 709, subclass 250.
2. The inventions are distinct, each from the other because:
3. Inventions I, II, III, IV, and V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a device for transmitting packets, invention II has separate utility such as a device and method for selecting data, invention III has separate utility such as a device and method for generating header information, invention IV has separate utility such as a device and method for storing data, and invention V has separate utility such as a method of receiving data at a data sink. See MPEP § 806.05(d).

Art Unit: 2665

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
